

Happenings Briefly Told

Doctors have declared a general strike at Avila, Spain.

British Columbia will send a large number of men to pacify Iran this year.

The British Admiralty deny that ships are being built for Japan in Great Britain.

The wife of Bela Kun, the former Communist dictator, has been expelled from Italy.

Complete cures of sleeping sickness are reported by Professor Cleveland H. Lariver of the Pasteur Institute.

Cherries will not be plentiful this summer in St. Catherine's district, as the cold snap has affected the blossoms.

Switzerland will not resume commercial negotiations with Russia until the Soviet's debt has been paid or guaranteed.

There were 30,975 automobile accidents in New York State last year, in which 945 persons were killed and 22,751 injured.

A report from the British Labor department shows that the cost of living in Great Britain declined eight points in March.

General Wrangel, former head of the south Russian Government has established a so-called Russian Government at Constantinople.

Lord Friby will preside over the inquiry which is to be held in England into the embargo which prevents live cattle landing in England and being fattened.

Wireless telephones are to be used by Chicago police in their war against crime. The City Hall being in constant communication with police stations and fire halls.

Calgary coal dealers and operators will reduce their prices by \$1.5 a ton if the railroad companies will reduce their freight rates 20 per cent. during May, June, July and August.

Soviet officers are putting into effect a decree proposing that the Russian army, desiring from pacifists and private individuals, shall be placed on the market and sold abroad to buy food.

Chop it fine and add a little salt and a teaspoon of sugar. For a No. 3 can of spinach, allow a cup and a half of white sauce. Rub together three level teaspoons each of flour and butter. Add one and one-half measuring cups of milk.

Cook stirring and if you have not put much salt into the spinach, add half a level teaspoon to the white sauce. Rub together the spinach in the butter. Put into a serving dish. Chop the whites of two hard boiled eggs and put around the spinach as a garnish. From the hard yolk, make golden rain. Press these through a strainer so that they descend on the spinach in little bright yellow bits.

Millers' Worm Powders will drive worms from the system without injury to the child. The powders are so easy to take that the most delicate can swallow them as speedy cases of pain, because they promptly remove the worms that cause the pain, and thus the suffering of the child is relieved. Will so relieve a crampy stomach that child should suffer an hour from worms.

The Manx Language. The Manx language is either very difficult or else exceedingly convenient, for Lord Raglan, speaking before the Society of Genealogists in London, said that he had never met two persons who agreed as to the spelling or meaning of any word in the Manx language.

The smallest number of teeth dislodged out by Nature falls to the lot of that great creature, the narwhal, which has only two.

Minard's Liniment for Dandruff.

Canned Goods a Great Help

BY LORETTO C. LYNCH
An Acknowledged Expert in All Matters Pertaining to Household Management.

America has reason to be proud of its canning industry which has reached a high point of perfection. Canners are located close to where the product is most plentiful and afterwards to other places, where perhaps this product is unavailable in the fresh state. Then, too, by the aid of the canners, we are able to have food all year round. The season of production is short for many things, and unfortunately, human beings must be fed all year round.

Try to jot down all the canned foods you can think of. Then take a first-class grocer's catalogue and look under "canned products." Perhaps it will surprise you to learn that the couple who have but a tiny kitchen in which to prepare their food, may obtain a can of codfish cakes. The fish freed from bones is flaked and mixed with mashed potato. This is the twinkling of an eye, from a small can one can mix six fish cakes and heat them in a little fat on the frying pan.

Then there is canned beef steak. Lots in one can for two or three people. From canned corned beef, one can make one delicious hash by the addition of a little chopped onion and as much cooked potato as meat. People often complain that a food is too rich. Food tastes rich because they have lost all the oxygen they possessed in the process of canning. But this oxygen may be put back into the food by spreading it out on a shallow dish and exposing it to the fresh air for a couple of hours. This is a very simple way of regaining it. The food tastes like fresh. Just try it.

A busy man told me the other day that he could really tell that I had used fresh crab meat in the salad he was eating. He declared he could tell it from the "fresh" smell. But he was only eating crab meat that had been kept in a little can in the cold, fresh air.

Take the case of spinach. Diet books, the doctor, and everyone generally interested in our physical well-being tell us to eat spinach. But outside of the fact that fresh spinach is almost unobtainable most of the year, it is a very good thing to eat. It takes a great deal of time and patience to prepare.

It is all very well to tell a busy mother to feed her family spinach, but with the thousand and one things the mother has to do, we can scarcely blame her if she instead puts a dozen cans of spinach on the table. But he was only eating crab meat that had been kept in a little can in the cold, fresh air.

Education in Alberta

Rapid Growth of Educational Facilities of the Province.
One hundred and seven school districts, covering an area of eighteen hundred square miles, were formed in Alberta in 1920, an indication of the rapid growth of the educational facilities of the province. At the end of 1920 there were 3,553 schools, or nearly six times as many as in 1906. During the past fifteen years an average of about two hundred additional schools have been formed per year, and attendance at schools has increased from 24,245 to 121,567. The amount of Government grants to schools increased from \$170,315 in 1919 to \$1,418,068 in 1920.

HOW RHEUMATISM CAN BE OVERCOME

Not By Rubbing, But By Enriching the Blood.

Rheumatism is a disorder of the blood. It attacks people when the blood is overladen with uric acid impurities, thus setting up inflammation in the muscles and joints. Wet weather or cold weather may start the victims of rheumatism, but it is not the cause. The cause is the uric acid. The victims of this malady have every reason to feel the difficulty in the limbs and joints, followed by sharp pains through the flesh and muscles; the limbs and joints, followed by sharp pains through the flesh and muscles; the limbs and joints, followed by sharp pains through the flesh and muscles.

Picturesque Dress Of Dark Red Taffeta

By Marie Belmont.
The quiet order of Victorian days are recalled in this lovely dress. It is originated in dark red taffeta. No sleeves are united with the tight-fitting bodice, but around the armholes and the neck line a tiny ruche of white lace is attached. The chief decorations on this dress are bands of very tiny black beads. This trimming follows the bodice and is also used with good effect on its lower part. The skirt is somewhat longer than those that have been so fashionable, and undoubtedly anticipates the new lengths. It is elaborated with ruffles of taffeta and bands of beads.

Most of the things you think you know are only things told you by someone who was told by somebody else who heard it—Detroit Free Press.

If one is troubled with constipation, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

J. Ferimore Cooper couldn't write unless he had gumdrops to chew. He bought them in large quantities, and as he bought them he carried the stories for which he is famous.

Flaming Meteorite Falls In Sea And Is Seen From S.S. Saxonia.

The German liner Saxonia, from London, reports when 15 miles off Chichester Head, south of Halifax, a meteorite was seen to explode and disappear, leaving a vast amount of smoke, which was visible for over ten minutes. The strange sight was witnessed by some of the officers, passengers and part of the crew. They first saw a big burst of flame in the sky and then a long column of smoke, probably 50 feet in length. They believe that the meteorite fell into the sea.

The wireless operators on the ship reported having had difficulty with their apparatus, and they believe that the meteorite had something to do with the electrical disturbance.

Girl, 4 Weighs 10 Pounds. Ethel May Poff, a four-year-old girl, tips the beam at 100 pounds. Her home is in Strong City, Kan.

German Color Scheme. Germany seems to be undergoing rapid color changes. A few days ago things were reported "black." Then we were told the people were feeling "blue." They claimed to be "green" about the origin of the war, and went "purple" with rage when the Allies demanded reparations. They acted as if they had a streak of "yellow" in their make-up, although indignation showed they were in "pink" of condition to stand the financial strain. The latest is that they are turning "red." But there's one shade to which they are immune. They never act "white."—St. Thomas Times-Journal.

Wire Service For Far North. Communications with the Far North will be maintained this summer by means of an increased telegraphic service between Peace River and Edmonton, according to R. C. McDonald, superintendent of Government telephones.

Quaker Minister Is Grateful to Tanlac

Rev. Parker Moon

Nearly everybody in Southwest Missouri either knows or has heard of the Rev. Parker Moon, who for a full half century has devoted his life and talents to Sunday school and organization work for the Society of Friends or Quakers.

"Uncle Parker," as he is more familiarly known, came from fine old Quaker stock, and there is not a better known or more highly respected citizen in that part of the state. In referring to his remarkable restoration to health by Tanlac, he said:

"About five years ago I suffered a general breakdown. My principal trouble was nervous indigestion. My appetite was very poor and my food seldom agreed with me, and I had to eat a very restricted diet. I suffered a great deal from headaches and dizzy spells. I had severe pains across the small of my back and was badly constipated most of the time. I was so weak and rundown I was not able to attend to my duties. This condition made me very nervous and I could not sleep at night. Frequently I would be awake most all night and was in that condition more or less for five years. My physician said he could not do anything for me and suggested a change of climate. I then moved to Texas and went back and forth three times but did not get the relief I had hoped for. Finally, I got so bad off I was not able to get around with any degree of comfort. I was also told I had heart trouble."

"I had read about Tanlac and, as it had been very highly recommended to me, I decided to try it. I got a bottle and had taken only a few doses until I could notice a marked improvement in my condition. I noticed especially that I was not troubled any more with sour stomach after eating, which was a great relief. I kept on taking Tanlac until I fully regained my health. My appetite is splendid. I enjoy my meals and I do not find it necessary now to take any laxative medicines of any kind. I can sleep much better and am not nearly so nervous as I was before. I take great pleasure in recommending Tanlac to anyone who needs a good system builder, or who suffers with stomach trouble. I have recommended Tanlac to a great many of my friends and am pleased to reach others by giving this statement for publication."

Would Perpetrate Armistice Day. In line with the suggestions made before the special legislative committee on soldiers' civil reestablishment, H. M. Moser (Portland), has filed a resolution asking the House of Commons to affirm that it is desirable to perpetuate the triumph conclusion of the war by observing each year the Monday in the week in which November 11 (Armistice Day), occurs, as Armistice Day and that "general thanksgiving to Almighty God" be proclaimed.

A prejudice against church organs still exists in Scotland.

On Friday, June 2nd, at the Union Church, Miss Jackson will speak to the 12 o'clock girls. The girls wish to extend an invitation to all to come and hear Miss Jackson.

The further article on "Trade Notes" is deferred till next issue.

A large number of trees have been planted by householders and farmers during the past two weeks. The grounds are also being further planted.

Mr. and Mrs. C. Laureysen arrived back from Holland last week, after an enjoyable three months holiday. Mr. Laureysen's brother accompanied him back, also several other friends who joined to settle in this district. Casey says that Holland is all right but "O You Alberta."

A meeting of Strathmore U.F.A. will be held in the King Edward on Saturday afternoon, and all members are requested to attend. There have been no meetings of the local U.F.A. for some weeks, owing to everybody having been busy with spring seedling, but seedling is now pretty well over, and farmers should have a little time to spare for the important business which is engaging the U.F.A. at present.

Strathmore G.W.V.A. Ladies Auxiliary held a very successful party last on Saturday in the Oddfellows' Hall, and realized over sixty dollars, which goes towards the foundation of the new hall, for which the ladies are making themselves responsible.

The Chevrolet Motor Co. have already reached their objective of selling twenty cars, and are continuing to sell in each purchase where the beginning of January. A big reduction of price of the popular "Chevy" is announced in Mr. Harold Bell's ad. on this week.

Miss Blanche Giffen, daughter of Dr. J. W. Giffen, has just attained her B. A. Degree at the University of Alberta at the age of 19 years, which is something of a record, and one on which the young graduate and her parents are to be congratulated. Miss Giffen carried through to the 12th grade in Strathmore High School and went from here direct to the University, and the success which she has made showed the value of High School training in centres like Strathmore, even where there is not the diversity of teachers as obtain in larger cities, where education is more specialized. Donald Giffen in another year will complete his training for the degree "B.Sc.", and emerge a full fledged architect. He has been very successful in his studies, and won high points in the tests preceding the closing of the University season. Donald has been in Strathmore on a visit for some days past.

Mr. and Mrs. Chas. H. Giffen, lecturers, are enjoying in the north of a son last week. Mrs. Giffen was formerly Miss Huberta McElhines.

The Women's Institute will meet at the lounge of Mrs. J. D. North, with Mrs. North and Mrs. Dewitt as hostesses. A paper will be given by Mrs. S. E. Hall on "Good Taste in Dress." R.C. Favorite Color.

Mr. T. M. Womers, Barrister and Solicitor, has accepted an agency for fire insurance from the Alliance Assurance Company, of London, Eng.

As anticipated the new tax rate for Strathmore has raised a host of protest and a deputation of ratepayers waited on the Town Council last night to air their grievances. However, it was too close to press time to publish the report in this issue.

Any new settlers arriving here last Tuesday would have believed that there was something in the legend about the streets of Canadian towns being paved with gold, but it was only Ford Brown's bank deposit which was shown at his hand by the strong wind on Tuesday. After a long search, in which willing volunteers participated, all was recovered but a six cent and a small change.

Strathmore U-Go-14s Girls Club are holding a Pantry Sale and Musical Tea in the Oddfellows' Hall on Saturday, May 21, from 2 p.m. till 9:30 p.m. Everyone welcome. Boys' and men's lunch at 6 pm.

A big dance and picnic will be held in the Strathmore hall on Friday, May 26th, and a big time is promised.

Work Starts on Hall

Saturday will be a big day in the history of Strathmore and district. The first sod will be turned then in the Great War Memorial Hall by Reeve Skene, of the Municipal district of Bow Valley, and by Mayor Butler, of Strathmore.

The primary object of the hall is that it be a memorial for the boys from this town and district who fought and fell in the Great War. This is all we can do for them now, for their bodies lie buried in foreign fields. The memory of their sacrifice can however, be permanently enshrined for our benefit and that of the future generations by a memorial of this kind, and it will help us to realize the high ideals which caused them to offer themselves up as a human sacrifice in the hour of their country's need, and we can perpetuate these ideals better if we have their memory constantly before our eyes.

Our duty, of course, does not end with the erection of memorial halls, etc. There are many dependents of fallen soldiers throughout Canada. There are also many men who have suffered disability through active service. Theirs' however, is a national charge, and it is our duty as ratepayers to see that the government never fails in this respect.

It would not be a fit or proper thing to solicit contributions for dependents of soldiers, or for disabled soldiers. They are entitled to an adequate compensation for the remainder of their days.

But, as we have said before, all we can do for those who have paid the greatest sacrifice of all is to erect an edifice that will fittingly enshrine their names and their sacrifices in our memory.

Their comrades who returned have taken the initial steps in the erection of a building to perpetuate their memory, and that will at the same time be of service to the community. They have the money on hand now to go a long way towards completing the building, but further funds will be necessary between now and the time of opening, which it is hoped will be July 19, and a substantial contribution is necessary from everyone in the town and district towards the cost. Many have already made substantial contributions, in several cases over the \$100 mark, but there are a large number who have yet to subscribe.

CARSELAND NEWS & NOTES

Mr. G. C. Melendy received word on Wednesday last of the death of his mother at her home near Chicago. As no word of Mrs. Melendy's illness had been received it is presumed that the end came unexpectedly. The deceased was well-known locally, as she had stayed at different times with Mr. Melendy, and all who know her will regret to learn of her death. Mr. Melendy left on the train on Thursday morning to be present at the funeral. Mr. Melendy and family will have the sympathy of the community in their bereavement.

Mrs. P. Travis, who has been sick for some time was taken to the Calgary hospital on Tuesday last, where she is receiving medical treatment for pneumonia. The latest patient as having improved.

On Thursday, the 12th, the baby of Mr. and Mrs. Walter Coia was taken to the hospital to get treatment for blood poisoning in the head.

Early in the same week the elderly Mr. Paul Coia was taken to Calgary for an operation for appendicitis and is doing well at time of writing. Mrs. Drake arrived in Carseland on Wednesday, the 11th, and with Mr. Drake, will take up residence in the National Elevator house, recently vacated by Mr. Larway.

On Wednesday evening, the 10th, the ball fans met for the purpose of organizing a ball team for the present season. Owing to the storm there was only a small attendance and nothing of a definite nature was done. On the part of those present there was a strong feeling that there should be a team and there is every probability of its becoming a fact in the course of a week or so.

A letter was received from London suggesting a league made up of Carseland, Cheadle, Dalemead, and Carseland. While no action was taken the plan was regarded as feasible. The inclusion of Blind Creek would make a fifth, if they are genuine, which we believe they intend to do.

Owing to the storm there were only four of the Hall Trustees present at the meeting on Wednesday, the 11th. These present reviewed the plans and specifications and decided for the purpose of having something to work on to send a copy to the Grain Growers at Calgary, and to T. Eaton for estimates. Upon the receipt of these quotations a meeting of the Board will be called to take further action. Mr. Hall Hill, who has been in the East for some weeks returned to Carseland on Saturday morning last in company with his bride. Mrs. Hill is a native of Peterboro, Ont., and she is in the West for the first time. Mr. and Mrs. Hill will take up residence in the W. Browne house. Mr. Hill may be staggered at a hearty welcome to the community.

A letter from the Government Telephone Dept. in reply to one sent by Mr. J. W. Crimney, as President of the Board of Trade re. phone service for Carseland, states that for the present no exchange will be placed in Carseland. Such a scheme, however, is on the slate for future extension. In the near future, a promise of at least two new lines from Strathmore was given to relieve the congested condition of the service, and the work will be commenced almost immediately. What new phones go into Blind Creek will, however, not be connected up with Blackie or Glenview, which, we

presume, means they will be put on the Strathmore exchange.

The wording of the letter indicates that the Department is fully acquainted with the lay out of the country, and is fully aware of the fact that Carseland has grown as a centre during the last few years.

Mrs. P. J. Coyle, of Montreal and Moncton, is paying a two months' visit with her son, Mr. G. Coyle.

DALEMEAD NOTES

Mr. E. F. Crawford, of Champion, spent the latter part of last week with his sister-in-law, Mrs. F. L. Crawford, returning on Sunday morning. Mr. J. Reid moved to Calgary on Sunday last and spent the day with Mrs. Reid and her mother, Mrs. Nelson.

Messrs. Hatt, McKinnon, and Rudolph attended the meeting of the joint church board at Carseland on the 9th inst.

All baseball fans are asked to turn out at the hall on Saturday evening next for practice. Come early, before it gets too dark to play.

Mrs. F. L. Crawford wishes to thank the people of the community for their expressions of sympathy in the recent bereavement.

The U.F.A. will hold a picnic at the McKinnon Ranch on Friday, May 27, 1921.

The U.F.A. has asked the musical members of the congregation to prepare a programme for the U.F.A. service to be held on June 19th.

BLIND CREEK NOTES

"Play Ball" is the order of the day. Practice was held by a number of the enthusiasts on Sunday afternoon last. It is proposed to make a hole to Glenview on the 24th.

A dance is being held at Geo. Macle's barn on Friday of the week. It will not be a box social affair, as was originally proposed, but supper will be served in the orchestra way. Blackie orchestra will supply the music. The proceeds will be put at least be applied to the piano fund.

The ladies of the Community have undertaken the responsibility of laying a piano which will be in use for the dance on Friday. Congratulations to the ladies for their enterprise. The instrument will make a great contribution to the social life of the community.

Mr. H. Boston entertained a number of his friends to dinner on Sunday last.

The Sunday school has been reorganized with the following officers and teachers: Mrs. M. F. Batchelor, Superintendent; Mrs. C. Robinson, Secretary-Treasurer; Mrs. Rhodes, teacher bible class; Miss Ballard, intermediate class; Miss Pugh, teacher primary class.

The choir is holding regular weekly practice in the school on Thursday afternoon, to which all who can sing are invited. The choir is making a great contribution to the services.

Miss Baker, Glenview, was the guest of Mrs. Batchelor all last week.

Last we forgot, however, Tuesday of next week, is Empire Day and everybody closes that day. There will be something doing in Strathmore all day. Ladies ball game in the forenoon, double header Hassar vs. Strathmore in the afternoon, amateur contest in the evening, and dance at night.

Harold W. B. BELL

DEALER IN DODGE BROS., CHEVROLET
& OLDSMOBILE CARS & TRUCKS

Solid, one-piece cast-steel frame.
Its solid, one-piece cast steel frame makes an engine bed solid as concrete. There is no bend, no twist to this frame. It always holds the parts in perfect alignment, and when it is necessary to put on new parts, they always fit perfectly. The tremendous twists and strains of a rough field do not harm the Hart-Parr 30.

You'll need a Hart-Parr more than ever this year

Experience is the best teacher we have in everything and that is why we selected the Hart-Parr tractor as the one we wanted to sell. It is built by the "Founders of the Tractor Industry." Back of it are twenty years experience in building tractors; twenty years learning how and why; twenty years digging out and perfecting improvements that have made the Hart-Parr 30 a leader as a powerful, sturdy tractor, simple enough for the farmer to drive, adjust and expert.

Farmers are going to need tractors more than ever this year. The reason is because he is not going to get war prices for his crops and he must raise them cheaper to keep his profits where they belong.

We'd like to talk it over with you. Show you what other Hart-Parr 30 owners have done and show you why it is the best tractor value on the market.

A Hart-Parr 30 will cut your production costs. We know it—we can prove it.

If you can't come in soon, write or telephone for a catalogue, but come in as soon as you can.

H. J. ANDERSON AND SON

Strathmore Phone 67

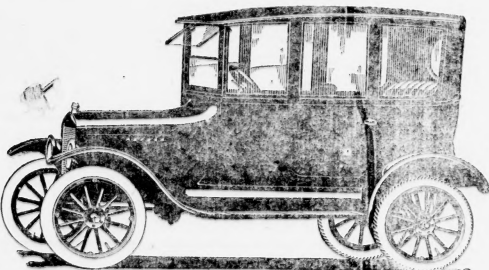

Many of the old Hart-Parr tractors that were built in the early days of the industry are still in use today. The first Hart-Parr tractor was built in 1900.

Sedan

W. C. Brown

Dealer, Strathmore

HAVE you ever given the Ford Sedan the close inspection it deserves? We will be happy to show you in detail its elegance of interior appointments, its refinement of comfort and convenience. And we will be delighted to take you for a trial spin. Let us assure you that your visit will place you under no obligation to buy.

Never has such abundance of comfort, protection, elegance and true dependability on all kinds of roads been combined so happily with economy in first cost and maintenance.

The Sedan serves the requirements of every member of the family. Mechanically it leaves nothing to be desired. The famous Ford motor develops dependable power more than sufficient for your needs. The Ford is always dependable, and can be managed by the most timid members of the family.

Never has such service been rendered in a car with so great a measure of economy.

And we amplify this service by keeping our supply of genuine Ford parts always complete, by having skilled mechanics always ready, by always taking a friendly interest in the welfare of your Ford.

General Principles Plainly Set Forth

Pooling Organization for First Complete Control of Grain Delivered.

A voluntary scheme of wheat marketing operated by a specially created organization directly responsible to its former producers, provided sufficient demand for voluntary pooling exists, and assuming the organization is desirous of according to that demand, is the recommendation contained in the report on wheat marketing prepared by James Stuart and F. W. Riddell, of the Canadian Board at the request of the Saskatchewan government.

The report suggests that a voluntary pool should be constituted on an experimental scale, rather than an attempt to be made to constitute a full-fledged scheme. In the first place we believe that the most perfect form of a centralized wheat marketing agency at the present time can be created only under the control of a national organization says the report.

Voluntary Form Desirable

"And secondly, we believe that in considering any form of wheat marketing pool, involving less than complete national control, one based upon voluntary cooperative effort on the part of the producer, is preferable to one limited by the provisions of a legal contract."

Dealing with the principle of any form of pool that constitutes, as emphasized that success or failure depended upon the degree of support given by the producer. While not real control in itself such an agency as the Canadian wheat board, provided distinct advantages to the producer if so wisely administered, such a voluntary pool or a non-monopolistic trust pool successfully operated on a comparatively limited percentage would be able to exercise sufficient relative influence over trade practices to reduce to minimum any disadvantages which the present system may have developed.

Object to Contract Pool

Objections were voiced in the report to a contract pool in view of the conditions which might arise under which either party to the contract would find the provisions onerous to say the least. This, in turn would bring into play, physical influences which might easily be sufficient to renege on the terms of the scheme. In order to make a binding contract for several years during the transition period, and applying to one contractor a similar scheme as wheat marketing, appears to us steps to be taken with a view to its to be one of the least desirable of proving marketing conditions. There is nothing that a producer would be required to do that he cannot do on his own free will. It is much more to producers' interests that they should realize this fact than that they should sign a contract only to learn it was a barrier to the realization.

Plan of Operation

Dealing with the possibility of accepting a voluntary pool on an experimental scale, the commission says:

"The general principles of a voluntary pool involve centralized selling, initial advances, and rapid delivery of proceeds or sales according to grade. The plan of operation would be a voluntary pool where the producer may deliver to the pooling organization without a contract the whole or any portion of his wheat, but where there are no optional marketing channels at the disposal of the producer within the pooling organization, all the wheat would be pooled. The pooling organization would have complete control of the wheat after receipt of documents such as bills of lading or storage tickets representing the wheat. Arrangements would be made for taking delivery of free stock without lots by means of storage tickets and for carting lots by consignment. This would apply to wheat handled by any licensed elevator and might also include cars shipped over the railways. The receipt of bill of lading covering consignments, or of storage tickets conveying lots, then enables a uniform advance would be made, based on one term in store for William."

Elevators Available

"Under this system the Canadian Grain Act as at present would render all country elevators and terminal facilities available for the purpose of the scheme. This system would be available to farmers at every shipping point whether a country elevator was located there or not."

"With regard to financing, a pool arrangement should be an attractive proposition for the banks in view of the fact that the initial advance would be only a conservative percentage of the value of the wheat pool. It might be reasonably expected that the banks would be ready to consider financing the scheme on its own merits, this being in effect what they generally do now, though advances given them, through the bank companies."—Revised, Calgary.

Tractor Demonstration

A practical demonstration of the Ford tractor will be held on the farm of W. G. Knyvet, 5 miles north of Strathmore on Saturday, June 24 at 2:30 p.m.

Mr. T. McInnes, mechanical expert, will be present and will be prepared to answer any questions in connection with the mechanical features of the tractor. This is your opportunity to see the tractor do some good work and at the same time get some information on its construction.

A farmers' meeting will be held in the Opera House at 8 o'clock the same evening. At this meeting A. H. C. Stock graduate of the Manitoba Agricultural College, a practical farmer, will lecture on farm problems. Questions and discussion will be invited. The lecture will be illustrated with specially prepared motion pictures. Come and hear Mr. Hockstock's interesting talk. No charge.

KNOWLEDGE OF AUTOMOBILES REWARD THEIR OWNERS

"The first thing the automobile owner is to know his car," says Harold Bell, head dealer in Chevrolet passenger and commercial cars.

"He should learn the basic mechanical principles of the construction and operation of his car. He should familiarize himself with those parts which commonly require attention."

"Automobile repair has been greatly simplified in the last few years. At most anyone can learn all that is essential to the proper care and operation of his car. And this is one of the reasons for the popularity of the medium weight car of today."

It is possible to acquire this knowledge of his car. With it the automobile owner can save himself much time and in convenience.

"He will find many other adjustments that he can take care of himself. He can often save unnecessary examination of his car by experts. He can anticipate and prevent bad things by eliminating trouble almost entirely."

The most common car troubles are the direct result of ignorance and carelessness. Knowledge is the proper preventive measure.

A minimum amount of intelligent attention will keep a car running better and longer. And an intelligent driver will operate his car so as to avoid unnecessary wear and tear.

The automobile, in its way, is as responsive to treatment as the human body. And if any ailment develops the most prompt and amiable attention is the quickest and best remedy.

PLAY BALL

Practice ball games will be held regularly on the Strathmore diamond, and players are invited to show up every night they can on Sunday afternoons.

Strathmore, Alberta, May 18th 1921

Church Finances

The financial statement of the Union Church, Strathmore, has just been published, and shows that expenses are being met, though the income is a difficult one. As most communities, the burden of supporting the churches falls on the shoulders of a comparative few, who contribute liberally, others contribute lesser amounts, while the contributions of many are nil.

Respectively of denominations, it is a public duty to support the churches. They are doing a good work, and a necessary work. There is no doubt that there is ample room for improvement in the conduct of the churches of the country, but that is to be easily done, it is to be in and help. There is more need for practical Christianity now than ever before. Respective of doctrinal differences, the churches perform an important part as the conservators of the morals of the community and give the moral and religious education to the young that is not taught in the public schools.

Like many others, we have the opinion that the churches have been inclined to dabble with matters that are more of political concern than moral or religious, and this has weakened the authority of the words that are spoken from the pulpits, but nevertheless the teachings that are contained in the old and New Testaments still have their ancient power over the mind of man, if they are presented to the people in the right way. The modes of presenting these teachings may vary, but the precepts themselves never do.

The Newspaper

With this issue closes a unique campaign in Alberta newspaperdom. The Calgary Daily Herald has been for the past thirteen weeks conducting a series of advertisements in the weekly newspapers of the Province with gratifying results.

The daily and weekly newspapers do not occupy competitive fields. The daily success on matters that the weekly cannot afford to handle, and vice versa. Good newspapers are of supreme importance to the community, for it is through them that the public receives its information and its impressions of local and foreign events.

If we were to cease, we must look for the suppression of the yellow press, which makes it its business to stir up antagonism between countries. For a positive factor we must also support the papers which are honest and independent, and present the news without coloring. We may dislike their editorial views at times, but must bear in mind that neither we nor they are infallible.

A little more than a year ago a former secretary of the Canadian Manufacturers Association promulgated a scheme to allocate advertising in newspapers according to their political views. Today, after an expenditure of several hundred thousand dollars, the scheme has been abandoned, and several daily newspapers that were receiving encouragement from the promoter are in liquidation. This ought to be an indication of the independence of the press in relation to the manufacturers. A newspaper that allows itself to be intimidated by its advertisers will soon lose the public's favor and then it naturally ceases to exist.

Human Stuff

Five years of globe trotting after leaving college has made Jim Pierce weary, he settling down and conducting his father's prosperous manufacturing plant in the East. After converting both himself and his father that he is a failure as a business man he decides to go West and manage a ranch which his father owns.

The foreman of the ranch and the owners of the neighboring land are conspiring to get control of the property and the arrival of the son spoils their plans. They scheme toward his failure.

Paying The Freight

People are wondering how the railroad couldn't come nearer cutting expenses if the business was stimulated and speeded up by a reduction in both freight and passenger rates. There is no congestion of traffic. There are many idle and empty cars and new rolling stock can be readily obtained. Part of the time problems therefore no longer exist. If the railroad and plenty of business and were not required to pay wartime wages they could be operated without a loss. But the raising of rates in order to meet increased cost of operation has had a depressing effect upon some lines. There are indeed certain industries wherein the difference between the new and old shipping rates means that there shall be no sale at all, and these are likely to be ruined. The position of a railway corporation rest in the ability to keep the rolling stock at work. An idle car is a liability rather than an asset. There is nothing to stimulate activity like low freight and passenger rates. They may be necessary, even if wages must take a decided drop.—Los Angeles Times.

Legacies the War Has
Left Us

Often I am led to wonder
Over the cruel trail of war
Oft I say and think and ponder.
Over the picture that I see
Men and women crushed and bleeding
Hope seems lost, no ray of light.
Are we to destruction speeding?
See these none to guide us try?
Frightful hunger trails the children.
Mothers stricken down with grief.
Wonders that from the world are hidden.
Brine pain and no relief.
Crissled by the hundred thousand
Minding no loss we forget.
Oft the Kaiser once demanding
Something that he could not get.
Children that one time were happy.
Father's joy and mother's pride
Now belied them, starving orphans.
Not for this fathers died.
One time happy wives, belied them.
Now isolated in widow weeds.
Sole support of home and children.
May God help in all their needs.
Hunger, ruin, and destruction;
Nations innocent must bear the pain.
All because unjust ambition.
Souls a piece he should not share.
Self, it had no thought for others.
Thinking thought of others pain.
Heeding not, we all are brothers;
Seeking thought but selfish gain.
Legacies the war has left us;
One we never shall forget.
'Tis a ruined world in chaos,
And the nations arming yet.
God haste the day when other men
A difference may see;
And give more time to peaceful thoughts
And better use for mortal.
H. W. GOTHARD
Ardenae, Alta

Jim circumvents them and, in a letter to his father, humorously suggests that he has everything he wants but a wife and would appreciate a nice eastern girl to share his life on the ranch. A few weeks later a school mate of his sister arrives home, and stand some land. Jim believes she has been sent by his father. His romance is ripped in the bud by the jealousy of Boka, a Spanish girl, the sister of one of his enemies.

How Jim Pierce finally decides to end the machinations of his love and win freedom to enjoy life and happiness, is told in "Human Stuff," the newest Harry Carey production, which is coming to the Open House on 1st.

"Human stuff" is announced as a fitting successor to "May We Marry Overland Red" and other recent Carey triumphs. It was directed by Edwin Keene, and the popular star is supported by Mary Charleson, Fontaine La Rue, Ruth Fuller Golden, Rudolph Christian, Joe Harris, Charles Le Moyne, Bobby Mack and many others.

Cheer Up!

Victoria Times:—
Those delirious preachers of Empire decay and financial disaster should find something to cheer them in yet another advancement from London that the new seven per cent Indian loan of seven and a half million pounds brought applications for no less a sum than twenty million during the five hours in which the bank was open for business. The rush of subscribers is regarded as something almost unprecedented and an incident was the demand for prospectus that a totally insufficient supply forced the bank authorities to reveal a staff of girls to type hundreds of additional copies. Apart from the obvious inference that there is plenty of money in Great Britain merely awaiting the subsidence of the industrial storm and the return of more stable economic conditions throughout the world, in general, the marvellous response of subscribers to this particular loan suggests to the average mind that the British investor's estimate of India's troubles is considerably lower than is popularly supposed. It goes without saying that the various bank institutions—whose facilities a war-time political undercurrent needs no emphasis—should invariably double an application list of this character are not frequently given to buying a pig in a poke.

King Edward Grill

Most Up-to-Date Restaurant in Strathmore

While lowering our prices, we are still striving to attain new standards of excellence for the benefit of our customers. We have just had the Grill and Ice-Cream and Soft Drink Parlor repainted and put into first-class shape, and the improvements having been completed it is now open for business again.

F. Miller, Manager.

Ask the OilPull User

Ask any OilPull user why this particular tractor is his first choice and he will tell you it is for one or more of the following reasons—

Dependability. The OilPull fulfills every job on time—no power for breakdowns, because it is unusually strong and powerful—no delays from overheating, because it is cooled with oil instead of water—no lost time due to ordinary tractor troubles, because over 40 years of power farming machinery building experience backs every OilPull.

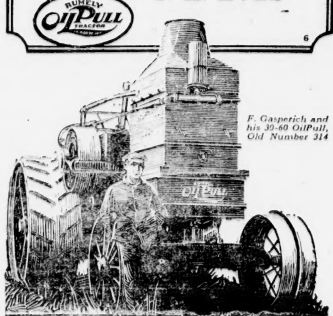

Economy. The OilPull will plow an acre of ground at less cost than any other tractor built. Being thoroughly constructed throughout, the cost of maintenance is unusually low. And from the ground up it is designed and built—and guaranteed—to burn kerosene successfully.

Long Life. The first OilPulls built twelve years ago are still working as steadily and economically as when new and performing big and difficult tasks. OilPull owners have the satisfaction of knowing that they have the best tractor value to be had.

Power. The OilPull motor develops tremendous power—25% over its rating. It delivers more power for its size and rating than any other tractor. This enables the OilPull to do work at belt and drawbar and gives many years longer life. And there's an OilPull for every size farm—12-20, 16-30, 20-40 and 30-60 H.P.—backed by a nation-wide service.

"UP-TO-DATE FARMING"

(by F. C. Butcher, Carleton Place)

We've bathed the boss's notices, we've cleaned the rooster's wattle, we've trimmed the turkey's wattles with antiseptic shears. With talent all the guinea hens are beautiful and bright. Old Dobbin's wreath of gleaming teeth we've polished snowy white. With patent satchet powder we've whitened the dog. And when we have the leisure we'll manure the hog.

We've done all in our power to have a barn de lux. We've dipped the sheep in can de mout. The little chicks are daily fed on sanitized worms. The calves and cubs are always bedded to keep them free from germs. And thoroughly to carry out our great hygienic plan.

Next week we think we shall begin to wash the hired man.

A Chedoke farmer was fined \$2.50 and costs last week for having allowed a bull to run at large.

A Vermeer forfeited \$10 and costs at a Police Court held on Monday for having stolen a buggy wheel from the back of John Taylor's blacksmith shop. Constable Pakenham prosecuted.

A Prairie Idyll

The spirit of romance is not killed by the monotony of the western prairie, the automobile, and the train. We have received from a correspondent living in the district east of Kamaska a communication, and now wishing to let the light of publicity beat too fiercely upon the dreams of youth, we do not publish the whole of it. The following, however, is part of the story:

A well-known young lady in our vicinity, who makes her weekly visits to the city, but not saying who she picks up on one of the nearby station platforms.

After a week-end courting away from home. The returning day came, they hated to come, but to the station they soon had to march, and on the train they appeared. But by reports there was too much room in the seats, so many passengers stopped to get down, but a voice came "the seat is occupied!" When the Blakie called "Strathmore." "Why are we going to part so soon, dear?" was said. Nothing but silence for a minute was, and then a sweet little voice sprang up. "I've thought of something." "We can have an hour and a half yet," so where do you think they landed? They had their choice, which was Strathmore, where a very enjoyable time was spent, not saying a word about it. When 4:15 came they were still on the spot, and the separation time came and the parting word was given, not saying what else. One went west by steam and the other went north by love. The next night, nevertheless, they made it up on the phone, and general delivered mail.

"Now isn't that perfectly romantic, Jack? Why can't you treat me like that?" "All right, but dear, I'll do my best but I'm so shy."

That's right Jack, carry on the good work.

A large Government telephone gang are at present replacing the poles on the main Calgary Medicine Hat line with new and heavier ones to carry the increased traffic. It is hoped that work will soon be started on the new route.

The Arbor Day holiday, which caused so many people trouble in connection with bank business, was only announced by the Government thirty-five hours previous.

THANKSGIVING DAY AND ARMISTICE DAY ARE NOW COMBINED

A bill passed by the present session of the federal house provides that the Monday in every week which equals the 11th day of November, shall be celebrated as Armistice Day, and such shall be kept as a legal holiday, as a commemoration of the day upon which the armistice was signed in the great war. The bill further provides that the holiday commonly called Thanksgiving Day, usually appointed by proclamation in the month of October, shall be in future proclaimed and observed for and on Armistice Day. The bill, which is numbered 119, is to be cited as the Armistice Day Act.
